*Welcome from*

## POPLAR MEADOWS *Angus*

Welcome to our Production Sale. We made the difficult decision to part with all of our 2020 bred heifers. We are very fortunate to have lots of feed but not lots of help, therefore something has to go. This opens up a tremendous opportunity to purchase heifers that we believe will be great breeding pieces and several with donor potential.

Earlier this summer a young fellow named Josh Taylor had this quote that really stuck with me. "There's one thing we have to remember. Not every calf that's born has to be a show heifer, but every show heifer has to be a productive cow. If not we have lost all the genetic progress we've made in the previous years." We strongly believe in the maternal cow power of our herd. I am confident there is females selling in this offering who will definitely make their mark in the history of Canadian Angus.

This group has 24 heifers who are a product of our embryo program. My Dad always stressed to me to breed the type of cattle you like and don't follow the fads. When you like your product they are easy to be excited about. These heifers were brought in off grass the beginning of September and are available to view any time at our Fort Fraser Ranch. Please check out the ultrasound data on CAA site on the heifers and please take note that we have DNA tested all the heifers we are selling. When we were picturing heifers I had tears in my eyes several times struggling to part with all of these heifers therefore I have decided to pair 6 heifers and offer choice. I will decide on who those will be shortly. We will arrange trucking to a central spot in Alberta and assist meeting up with Knils to take cattle East from there. Please purchase with confidence and we believe in treating people that way we would like to be treated – fairly and honestly.

Welcome from

## BOHRSON MARKETING Services

If you're in the livestock industry and you think of beautiful British Columbia, you will instantly associate the Poplar Meadows cow herd to it. Very fitting to say, as the views while touring the herd here, almost match the depth of quality that's very apparent in this operation. Tanya, Monty and family welcome you to their big production sale November 6, 2021 at their Fort Fraser sale facility.

I've really enjoyed my time talking with Tanya throughout the years and appreciate her outlook on the cattle industry. Numerous hours we have talked about cattle, of all breeds and colours, now while Angus will always be number one and very near and dear to her heart, she has always said she can appreciate that a good one is a good one no matter what, a true testament to her cattle knowledge and skill set. The Belsham family has dug in deep and are offering you their entire bred heifer pen this fall. This offering is diligently picked through and is shaped to be a very consistent set with a heavy emphasis on maternal strengths, feet and udders are an absolute must and have to be as near perfection as possible to stick around at PM. This is something you will see very clear as you tour through this offering. As you study pedigrees you will see the strength of cow families and the heavy utilization of some of the best bulls within the industry via either AI or by purchasing great walking sires. If I've said it once I've said it 100 times, the Poplar Meadows cowherd is one of the most

consistent, "cookie-cutter" type herds of cows you will walk through. Just this summer, we had the opportunity to sell PM Tibbie 216C, a female bred and raised right here Poplar Meadows, and she has been regarded as one of the most sought after cows in the industry, which was evident when she sold for \$38,000. (many of her half and 3/4 sibs will be available on this sale). The last year of livestock shows before COVID-19 Tanya and her partners made history as they were awarded "North America's Championship" when they became the first folks to ever exhibit both the Champion Angus Bull at Canadian Western Agribition and The Denver National Western Stock Show, (both his progeny and service will be available at the sale) This is just a small example of the potency within the PM cowherd, and November 6th will be your opportunity to buy into a piece of the program.

We really hope you make a holiday of it, and come out to Fort Fraser for this big time bred heifer sale. I promise you the sights, hospitality and of course the stock will be worth the drive out. However, if your not able to make it, please feel free to reach out to Tanya, or any of us at Bohrson Marketing Services, as we will be very familiar with the offering.

*Taylor Richards*

Welcome from

## OBI LIVESTOCK Ltd.

Welcome to the Poplar Meadows Bred Heifer Sale. I am very proud to be associated with Monty and Tanya and family over the years and have developed a great relationship and better yet a trusting relationship. I do enjoy my visits every week with Tanya and her outlooks not only in the cattle industry but in life in general.

The opportunity to go into this cow herd and have a chance to own any of the bred heifers from a top-notch program is second to none. When you go through the program you can appreciate the matrons these bred heifers come from. Poplar Meadows has really established a fabulous cow herd with strict culling and keeping the good ones that are mainstays at the farm. The development of this cow herd is apparent in the amount of visitors Monty and Tanya get every year. The bred heifers on offer are a spectacular group with many sisters selling and are a very uniform set.

The herd bull battery Poplar Meadows has obtained is with great selection and a lot of consideration and homework done. PM Executive Decision 5'17 & Bar-E-L Natural Law 27Y lead the way with many others. The ET program here as well is very evident on this sale offering. Using A.I. sires as well has made this cow herd what it is today with new genetics that work. These bred heifers just came off pasture and are built with longevity and fertility in mind. These females go and work for their new owners as many can attest to. The bull sale this past spring had many purebred bulls sold to top end cattlemen. Sound, functional cattle do have a place in this industry.

I am very familiar with the Poplar Meadows program and if I can assist you in any way in your selections, please do not hesitate to call me.

SIRE

McCumber Tribute daughter off of a beautiful young cow. We showed her dam as a May 2 year old with a great big Sky High bull calf at the fall shows. That bull calf was purchased by J Lazy A Ranch. I think this will be a very productive cow and there aren't many Tribute females in Canada to be had. We toured McCumber this past Spring and were impressed with their consistent herd and Tribute's dam and granddam. Both were exceptional cows. **AI Bred April 19 to Coleman Bravo. Exposed May 20 to August 15 to Riverfront Stunner 021H. Exposed June 7 to August 15 to Blast Encore 4H. Vet called 3 months (Sept 1).**

This is Taylor and Alaina's second bred heifer and another really good one. It's interesting to see how many of the Consensus 7229 daughters I still have producing. This heifer goes back to the Remitall Blossom 253P cow I bought as a 2 year old in 2006. It's quite shocking how just one cow can make such a huge impact on your herd. I remember the sale vividly as it was choice the 2 year old or her heifer calf. I took the heifer calf and you could see and feel from the crowd that they thought I should have taken the cow. After the sale I asked Brian if I could take the cow too. And the rest is history. **AI Bred May 2 to Chestnut Turning Heads. Exposed May 20 to August 15 to Riverfront Stunner 021H. Exposed June 7 to August 15 to Blast Encore 4H. Vet called 3.5 months (Sept 1).**

This heifer brought me on a trip down memory lane as she traces all the way back to my first 4H project Mayflower of Poplar Meadows 1E in 1974. Lia and I remember going to the Woodwynn Farms Dispersal sale on Vancouver Island in 1972 where Mom and Dad bought Lady May E X of Woodwynn. I think they paid \$975 which at the time was quite a lot. It's cool to see how those genetics are still working for us. Sorry got sidetracked but this is a good heifer out of a nice young cow. **Exposed to PM Tribute 1'20 from April 27 to August 15. Exposed to PM Tribute 117'20 from June 7 to August 15. Vet called 4 months (Sept 1).**

This is a very good 1/2 blood Simmental heifer sired by Natural Law and out of a cow I imported from the US. I sold all my Simmental cows but 2 because I was struggling to get them transferred. Last summer I managed to get that accomplished. **AI Bred May 1 to Chestnut Turning Heads. Exposed May 20 to August 15 to Riverfront Stunner 021H. Exposed June 7 to August 15 to Blast Encore 4H. Vet called 4 months (Sept 1).**

## NOTES

# MEET OUR RANCHERS

*Q: Why do you raise Angus cattle?*

A: "The main reason is because I wanted to do something with my family. My dad raised cattle until he passed in 2015, and my sister, Lia, still cares for a herd," Tanya shares. "I did spend some time away from the ranch, but it just made me realize how important this lifestyle and my family are to me."

*Q: Why is it important for ranchers to share their traditions?*

A: "It's up to us to teach the next generation about where their food comes from. Sharing why we do what we do is an important part of that," Tanya says. "One of my favorite ways to do that is walking around the ranch with my granddaughters, showing them the cattle and land."

*Q: What does ranching provide that other jobs don't?*

A: "It's the wide open spaces for me," Tanya says. "There's nothing greater than sitting in the field and watching healthy calves running around in the sunshine. That scene is a satisfying reminder that whatever you put in, you get back out."

## The Belsham Family, Houston, British Columbia, Canada

Tanya Belsham was born the same year her parents, Frank and Dianne Stimbold, bought their first Angus cows. It was the start of a superior herd for the Stimbolds and a foreshadowing hint of what young Tanya would one day make her career. Before meeting her husband, Monty, and having their son, Taylor, Tanya did leave the ranch to work as a real estate agent, but the enticing rural life and ties to family brought her back to the black-hided animals she loves so much. It's her honor to continue a legacy her family started long ago and to share it with her two granddaughters.

"My family has been here for over 100 years,  
and we're blessed to see the heritage continue."

*One of many ranching families  
raising the best Angus beef.*
